

Problem 7
Two Sum

Difficulty: Level 1

Given an array of integer numbers and an integer target, return indices of the two numbers such that they add up to target.

You may assume that each input would have exactly one solution, and you may not use the same element twice.

You can return the answer in any order.

For example,

If the array is 2, 7, 11, 15, and the target is 9, the input and output format should be like below.

Input:

2 7 11 15
9

Output:

0 1
